

Panama city energy storage market

RE+ Events has been expanding its portfolio internationally for several years, successfully establishing platforms for the renewable energy and clean tech industries globally; the company's director of international partnerships, Benjamin Low, told pv magazine. This includes the growth of our flagship trade show, RE+, as are international shows such as RE+ Mexico, and Electricity Transformation Canada. Given this momentum, Central America emerged as the next natural step in our expansion strategy, and we're thrilled by the enthusiasm it's already generating.

It serves as a major logistical hub due to the Panama Canal and has a highly accessible geographic location; Low said. COPA Airlines, Panama's flagship carrier, provides direct flights to and from numerous cities, making travel to the event straightforward. Panama also has a dynamic and expanding energy sector, with strong growth anticipated in the clean tech sector from 2025 onward.

Low said RE+ aims for a few hundred attendees and has secured partnerships with key companies and regional organizations, including the Panamanian Solar Energy Chamber and the Panama Green Building Council.

The RE+ brand encompasses more than just solar and storage; Low said. While these sectors will certainly be well-represented, the event will also feature solutions from other areas such as electric mobility.

Your personal data will only be disclosed or otherwise transmitted to third parties for the purposes of spam filtering or if this is necessary for technical maintenance of the website. Any other transfer to third parties will not take place unless this is justified on the basis of applicable data protection regulations or if pv magazine is legally obliged to do so.

You may revoke this consent at any time with effect for the future, in which case your personal data will be deleted immediately. Otherwise, your data will be deleted if pv magazine has processed your request or the purpose of data storage is fulfilled.
