

Paraguay pumped hydro storage

Paraguay has three hydroelectric powerplants which meet 100 per cent of its electricity requirements, and coverage is more than 99.92 per cent. The country's demand will be met by current generation until 2033, after which it will be necessary increase its generation capacity, and hydropower development is considered to be the optimum way to achieve this. This paper details the current plants in operation and outlines future capacity expansion plans.

The bi-monthly International Journal on Hydropower & Dams features research papers, case studies, project updates, business and financial news, and policy papers aiming to help advance the state-of-the-art of dam engineering and hydropower development.

Subscribe Now Special Publications World Atlas of Hydropower & Dams 2024 Energy data from more than 180 countries and guide to companies and organizations active in hydro and dams.

Our programme of international events bring together experts from across the industry to explore the latest technical innovations, financial and operational challenges and new development opportunities.
