The economy of Ghana has a diverse and rich resource base, including the manufacturing and exportation of digital technology goods, automotive and ship construction and exportation, and the exportation of diverse and rich resources such as hydrocarbons and industrial minerals. These have given Ghana one of the highest GDP per capita in West Africa. Owing to a GDP rebasement, in 2011 Ghana became the fastest-growing economy in the world.

The State Grid Corporation of China (SGCC), commonly known as the State Grid, is a Chinese state-owned electric utility corporation. It is the largest utility company in the world. As of 2022, State Grid is the world's third largest company overall by revenue, behind Walmart and Amazon. In 2022 it was reported as having 871,145 employees, 1.1 billion customers and revenue equivalent to US\$460 billion. It is overseen by the State-owned Assets Supervision and Administration Commission of the State Council.

The electricity sector in Peru has experienced large improvements in the past 15 years. Access to electricity has increased from 45% in 1990 to 96.4% in 2018, while service quality and efficiency of service provision improved. These improvements were made possible through privatizations following reforms initiated in 1992. At the same time, electricity tariffs have remained in line with the average for Latin America.

Ghana generates electric power from hydropower, fossil-fuel, and renewable energy sources such as wind and solar energy. Electricity generation is one of the key factors in order to achieve the development of the Ghanaian national economy, with aggressive and rapid industrialization; Ghana's national electric energy consumption was 265 kilowatt hours per each one in 2009.

E-Control (ECG) is the government regulator for electricity and natural gas markets in Austria. It was founded in 2001 on the basis of the Energy Liberalisation Act. E-Control's main duty as the independent regulatory authority is to "oversee and to control the Austrian gas and electricity market in the best interest of the consumer".
