

Power station solar panel

Power station solar panel

A solar power station, also known as a solar farm or solar park, is a large-scale facility that harnesses solar energy to generate electricity. It consists of multiple solar panels or mirrors that capture sunlight...

Ideal for powering tablets, laptops, fridges, TVs, and Bluetooth(R) wireless speakers, all feature AC and USB charging outlets, while the lithium-iron phosphate battery delivers more than 3500 charge cycles for 10 years of daily use.

The Battery Management System (BMS) protects against overheating, overloading, and overcharging. Pass-through charging allows devices to operate while the power station is charging.

The 600W, 1200W, and 2000W Power Stations include Emergency Power Supply (EPS) functionality which instantly switches connected devices to the Power Station's battery during a loss of power.

The PREDATOR 100W, and 200W Foldable Solar panels--also showcased at SEMA today--are super lightweight and use high-performance monocrystalline solar cell technology for maximum efficiency, output, and longevity.

The PREDATOR 350W Portable Power Station will be available in stores and online in mid-December. The 600W, 1200W, and 2000W will be available early 2025. They will only be available at Harbor Freight.

Members of the Harbor Freight team are available for media interviews onsite at SEMA. For Harbor Freight interview requests and media inquiries, please contact Donna Walker at donna.walker@harborfreight.com, or our Corporate Newsroom at corporate@harborfreight.com.

The SEMA show, which focuses on the automotive industry and showcases upcoming products, attracts more than 161,000 attendees annually, including representatives from over 140 countries and 3,300 media representatives.
