

The Pride Solar DSP Sine Wave Inverter comes with the choice of charging of batteries by Grid as well as solar with automatic change over from mains to battery and from battery to mains like a regular inverter. It employs an inverter circuitry, two-level battery charging from mains, Solar Charge Controller and fast change over mechanism during power failure and resumption.

Provides maximum protection against intrusion, theft, pilferage, sabotage is an active deterrent - not only delays / denies entry to a secured area but detects intrusion and indicates the area of attempted intrusion on a graphic panel in the Control Room.

The Solar Powered Fences are powered by an ENERGIZER which sends out high voltage monitored pulses into the fence at controlled intervals. An intruder or trespasser gets a very sharp, short and painful shock. The Solar Powered Fence is the physical barrier but the shock is the real barrier - a psychological barrier created in mind of the person, who has experienced the shock!. The shock given by the fence is completely safe as it lasts only 3 millionths of a second with energy output of 4 - 5 joules, an internationally accepted standard for such types of fences, worldwide.

Very high threat perception areas such as Political, Defence and strategic establishments of all types (ammunition/armament factories, dumps & depots, naval stations, army outposts), Civil airports and Military airbases and runways, International borders, Prisons, Helipads, Mines, Mints, Factories and Plants, Office and residential complexes, Warehouses, Country Clubs, Farms and Farm Houses, Bungalows, Open stockyards (Cars, Oil, builders materials).
