Precision electricals dealers

Series 3 is the entry-level range of our family of modular electrical switches, miniature circuit breakers, and electrical accessories. No expertise has been spared on the components, with switches, border plates, and shutters available in various finishes, colors, and orientations for its style-conscious clientele..

Series 2 Prime is an essential range of non modular piano-type switches, electrical accessories and switchgear, comprising practical and low-cost solutions for residential and commercial applications.

The D5 series comprises a discreet and well-organized range of distribution boards, which can be arranged in concealed electrical boxes or out in the open. They include all the necessary components such as gland plates, identification labels, protected corners, keyholes, and sliding knobs.

Our exhaustive range of electrical accessories, which includes a variety of products meant to support electrical amenities in residential and commercial applications. Includes power strips, doorbells, plug tops, extension boards, and unconcealed & concealed boxes such as galvanized iron boxes, gang boxes, and surface boxes.

A sophisticated and premium series of modular switches and accessories, with world class design and long-term performance. With an overall luxury appeal, the Series 7 is our most preferred range of products for an upgraded lifestyle.

Our most desired and versatile range of modular switches and accessories, the Series 5 adds value to our customers" lives by delivering a premium aesthetic and great performance.

The Series 3 is an entry level range of products and the newest member of our modular family. Our Series 3 switches are available in both regular and flat variants with standard and chrome border plates.

An extensive range of electrical accessories, each item has been designed to meet stringent standards of quality, functionality and aesthetics, and establish a new way of living.
