

Qcells 10kw home storage

Qcells 10kw home storage

The QCELLS Q.Home+ Energy Storage System (ESS) is a module energy storage solution for North America that includes a hybrid inverter, battery charger, Lithium-ion battery, backup power switch, and monitoring system all in one integrated package with a 10-year product and performance warranty.

The Q.HOME+ ESS lithium battery comes in a modular design that delivers from 4.5 kWh up to 18.9 kWh for both DC-coupled and retrofit AC-coupled configurations. Connect up to three batteries in series using only one inverter and battery management system. The integrated backup power function delivers 100% of the rated inverter AC output to support critical loads in the event of a power outage. The lithium battery has 90% depth of discharge (DoD). Remotely monitor the web portal or mobile app.
