For any inquiries or to schedule an appointment, our friendly team can be reached at 01708 751814. Trust R S K Tyres & Wheels Ltd to give your alloy wheels the attention they deserve and experience the transformative effect it has on your vehicle’s overall appearance.

This matte black 17' load rated alloy wheel is as tough and rugged as they come. With a massive 1250kg load rating, the Overland is cut out for any task and made to take the abuse of the most extreme terrain.

The design of this wheel is a classic, rugged full-face design with a mid-concave profile, built to protect your brakes and suspension from sharp rocks and debris you might encounter when exploring. This wheel means business and gets the job done, while also looking the part when paired with chunky off-road tyres making it the perfect wheel for a strong Swamper/offroad build.

All-Terrain Tyres This set of wheels comes fitted with 245/65/17 load rated all-terrain tyres. We currently offer three popular tyres for the 17' alloys: The Road-X RX-Quest AT21, The General Grabber AT3, and the much-loved BF Goodrich All-Terrain KO2. All of these very capable all-terrain tyres carry a load rating of above and beyond T32 capacity ensuring maximum performance and safety. The Road-X, General, and the BF Goodrich are all highly praised by enthusiasts for being capable off-road, without compromising ride quality on tarmac.

These wheels boast a cool gloss black colour that adds serious style to your vehicle. Plus, they come with a solid load rating of 1250kg per wheel, giving you the freedom to roll with confidence. Upgrade your look effortlessly!

235/50/18 101 XL Rated tyres - A lower profile option for maximum style and a lower ride height - suitable 250-290 models, 1650kg axle weight
235/55/18 104 XL Rated tyres - Slightly bigger profile to give more comfort and more capacity - suitable for 250-340 models, 1800 axle weight
235/55/18 104 XL General Grabber All-Terrain tyres - For a more rounded performance on all-terrains, the Grabber AT3's give more presence, and a whole different style.

When it comes to wheels and tyres, all the variables need to be considered, including your vehicle's ride height, weight, and age. Each of these elements play a significant role in determining the most suitable tyre for your specific vehicle.
