Renewable energy project management jobs

Enertis Applus+ is a global consulting and engineering firm, leader in the renewable energy and storage solutions sector. We are present in more than 65 countries and participate in different industry associations. We are an agile and transparent company, which ensures neutrality and is firmly committed to customer advice.

Our Engineering area is formed by a consolidated team that works nationally and internationally in the basic and detailed design of renewable energy projects. Its mission is to ensure that these designs meet the highest quality standards to maximize the profitability of our client's projects. We also have a specialized team that acts as Property Engineering and supervises the construction and commissioning phases of the projects, reporting the progress of work and ensuring the quality of the work in the different disciplines: civil, electrical and mechanical engineering.

DTE is one of the nation's largest diversified energy companies. Our electric and gas companies have fueled our customer's homes and Michigan's progress for more than a century. And as Michigan's largest source of renewable energy, we're creating a cleaner, healthier environment to power our future. We're also serving communities beyond Michigan, where our affiliated businesses offer renewable energy, emission control technologies, and energy services to industries in 19 states.

But we're more than a leading energy company... and working at DTE is more than just a job. At DTE, we take great care of each other and our customers, and we use our energy to be a force for growth and prosperity in our communities. When you join us, you'll be part of a team that welcomes, recognizes, and celebrates differences and values everyone's health, safety, and wellbeing. Are you ready to make that kind of difference? Bring your energy to DTE. Together, we can achieve great things.

Emergency Response: Yes - Must be available to perform a primary assignment in support of DTE's emergency response to storms or other events that impact service to our customers.

Incumbents may engage in all or some combination of the activities and accountabilities and utilize a variety of the competencies cited in this description depending upon the organization and role to which they are assigned. This description is intended to describe the general nature and level of work performed by incumbents in this job. It is not intended as an all-inclusive list of accountabilities or responsibilities, nor is it intended to limit the rights of supervisors or management representatives to assign, direct and control the work of employees under their supervision.
