

# Renewable energy storage yemen

Renewable energy storage yemen

We have been providing services with great satisfaction since the installation of solar energy at the health centre, where life has now returned. The equipment is now working. We can now spare people the hardship of having to travel to health centres further away.

Phase II of the Yemen Emergency Electricity Access Project is a four-year project implemented by UNOPS with \$100 million in financing from the World Bank Group's International Development Association (IDA). The project aims to improve access to energy for people living in rural and peri-urban areas across Yemen. Read more here. Phase I of the project, implemented by UNOPS and funded through a \$50 million IDA grant, ran from 2018-2022. Read more here.
