

SOLLATEK AVS15AMPS

SOLLATEK AVS15AMPS

The AVS15 is the most complete power protection device combining over voltage, under voltage, power-back surges and spikes/surge protection. Additionally, there is a delay when power returns to normal. This will ensure that the appliance is not switched on-off repeatedly during fluctuations nor it is subjected to a massive surge normally experienced when power returns after power cuts. Also accommodating a start up / inrush current of 70Amps.

TVGuard, a staple in the iS range, protects high voltage appliances by disconnecting the power to your appliance if the mains power increases above the pre-set limit. The automatic Voltage switcher (AVS) function automatically reconnects power when voltage decreases to an acceptable level. The built-in TimeSave function provides maximum operation time and better efficiency to your appliance restoring power after 10 seconds rather than the industry standard 30 seconds. As part of the iS range, the TVGuard can also withstand a loss of neutral in the mains.

Automatic Voltage Switcher (AVS(TM)) function The TVGuard will disconnect the power to your appliance if the main goes above a pre-set limit. The TVGuard will re-connect automatically only after the supply has returned to acceptable limits after the 30 seconds wait time.

TimeSave(TM) function The TimeSave(TM) function will ensure the TVGuard provides maximum operation time to your appliance by having built-in intelligence to check the off time. If the unit has been off for more than 30 seconds, it will reconnect the mains within 10 seconds rather than the standard 30 seconds wait time.

Comfort at home should never be a luxury. Thus Nexus develops top notch Air Conditioners that last yet deliver optimal cooling performance and satisfaction. Be assured you are buying a durable and reliable Nexus 1.5HP R410a Air Conditioner. This well-designed air conditioner offers you the ultimate convenience, especially during hot weather conditions. Experience cooling freshness every day with just a click of a button with the Nexus air conditioner.

This Gree 1.5HP R410 Inverter AC is a stylish wall mounted system which is highly efficient and energy saving. This model brings spectacular performance and style to any room. Designed to meet the harsh Ghanaian weather with cozy comfort even in extreme hot days. Unlike the conventional on/off systems, its G10 Inverter technology ensures that the system reach the desired temperature faster and maintain consistent comfort levels, resulting in greater efficiency and significant energy savings.
