## Sao tome and principe off-grid solar

With an overall experience of more than 50,000 MW of renewable energy projects in Africa, America, Asia and Europe and more than 50,000 km of electrification infra-structure planned Gesto develops projects that contribute to sustainable energy access and to the development of a better world.

Gesto's collective experience in renewable energy assessment and project development comprises solar, wind, hydro, geothermal, biomass/msw and waves energy resources projects on a global basis, with an overall experience of more than 50,000 MW, supporting all phases of energy project development.

The energy sector is evolving rapidly with new technologies coupled with the increasing influence of digital innovation. Gesto is part of that evolution developing innovative solutions that contribute for a better world.

Gesto breakthrough approach aims to improve quality and efficiency in energy grids offering a range of alternatives solutions in terms of monitoring, control and optimization.

With more than 50,000 km of electrification infra-structure planned, Gesto has extensive experience in legislation and energy policies, electrification master plans (both on-grid and off-grid), rural electrification design/engineering studies, feasibility and grid studies, energy efficiency and losses reduction, asset and grid management, financing and procurement, owners engineering and construction supervision.

Gesto is an international company focused on energy consulting and renewable energy project development. Gesto was founded with the aim of being a leading adviser and a trustworthy partner in creating sustainable energy sectors, thus improving people's lives and making a world of difference.
