Schneider electric official website

For over 100 years, Schneider Electric has been manufacturing a wide range of residential electrical products, such as electrical panels, light switches and electrical sockets, surge protection, and uninterruptible power supply. Our products can be found in forty percent of US homes, and they are recognized by consulting engineers, contractors, home builders and distributors as the gold standard of safe, reliable, high quality power distribution.

With that expertise as our foundation, Schneider has become a leader in the digital transformation of energy management and automation. From energy and sustainability consulting to optimizing the lifecycle of assets, we provide products and services to meet the needs of residential, commercial and industrial customers. Our technologies, like Schneider Home, help our customers become more efficient, reduce costs, and meet their sustainability goals.

We are excited to provide homeowners with a simple, integrated system to help them transition to an all-electric home, optimize their electricity use and thereby reduce their carbon impact. It is our foundational belief that impact can only be possible with a collective effort from an ecosystem of customers, partners, employees, suppliers, and communities. We hope you join us in our ambition to achieve a more resilient, efficient, and sustainable world. Together we have the opportunity to make an impact. Impact starts with us.

1. Visit this page2. Click the green chat window3. Select "Chat with an expert".4. Choose "Troubleshooting and Installation" and then "Solar for residential."5. In the Support Center, share your First Name, Last Name, Email, and Phone to reach technical support.
