Self build steam engine kit

The parts are well made and go together without fuss. The instructions are clear and easy to follow. Best of all the engine ran very well the first time I fired it up. My dog loves the whistle too!

I recently bought this kit and I must express how amazed I got because of the quality of the parts. Being a doctor of dental surgery I am quite used to opening boxes with new tools of excellent design and workmanship, and this Retrol kit gave me the exact same feeling of joy. The quality is exorbitant. (And the engine runs the same way) Thank you so much. Klaus Lytzhøft, Denmark
