

Shipping lithium batteries internationally

Shipping lithium batteries internationally

We have an expanded battery acceptance program available for contract and Solutions for Small Business customers. Contact your sales representative or call Customer Service at 1-866-607-6301 for more details.

The Lithium Battery Mark has been updated. The mark has been updated to a new size of 100mm x 100mm and no longer requires a phone number. Both the old and new versions of the mark can continue to be used until December 31st, 2026. As of January 1, 2027, only the new version will comply with regulations. The UN number is required on both versions of the mark. The phone number is only required on the old version.

Because lithium batteries are considered a hazardous material, there are some regulations you have to follow if you're going to ship them internationally. We'll walk you through everything you need to know about packing, labelling, and shipping them!

Variation: If you can't find the watt-hours listing, multiply the volts by the ampere-hour (Ah) instead. For example, if you have a 12 V battery with 4.4 amp hours, multiply $12 \times 4.4 = 52.8$ watt-hours.

Warning: Avoid putting unpackaged or loose batteries inside the box since they could easily roll around and bump into other batteries, which may cause a short circuit or fire hazard.[7]XResearch source

In the modern era, our lives are intricately linked with electronic devices – from the cameras that capture our favorite moments, to the smartwatches that track our health, and the mobile phones that keep us all connected, no matter the distance. At the heart of these devices are lithium batteries, a powerhouse of energy in a compact form.

However, when it comes to transporting and shipping all these gadgets, especially across international borders, the presence of lithium batteries adds a layer of complexity. At Eurosender, we're here to demystify the process of shipping lithium batteries internationally. In this article we have gathered all the information about shipping batteries internationally by road, sea and air.
