You probably have a few electrical items that need frequent charging or constant access to mains power. If you need to use these in the car, you might find them running out of juice without a power pack or car power inverter - and power packs will struggle to recharge larger and more power-hungry items.

A power inverter uses the 12V supply in your car and transforms it into a 240V supply, the same voltage as the plug sockets in your house. The transformers feature a UK three-pin plug, allowing you to charge laptops, drills and other power-hungry items from the car. You might not use it regularly but a car power inverter can be a lifesaver if you're away from a mains power supply for extended periods - if you're camping, for example - or you need to provide lighting for an area without a mains connection.

To test our selection of car power inverters, we brought along an iPhone, iPad, an Android phone and a laptop, plus a couple of things you might have in your garage - a 24-LED lead light and an 18V battery charger. To be in with a chance of winning, the inverter had to be able to cope well with whatever we plugged into it. We measured the noise of each inverter's fan by using a decibel app on a phone, and how much voltage it produced when illuminating a 60W bulb. Points were also awarded on whether the product had a USB socket and whether it was compatible with the Apple items.

The Bestek MR13013BU runs the Ring power inverter close as it handled all the products we tested, and it has two USB sockets. These ran straight through the device, so you didn't need to turn the unit on for them to be operational. Its stylish finish, good price and compact size and weight were other plus points, although it lost points due to its noisier fan. At 16dB above the usual level, it is slightly more intrusive than the Ring and is running all the time that the product is switched on.

While it may be a newcomer, the Portable Powertech 12V power inverter is a strong contender in this test. We liked the ability to connect it with either the cigarette lighter or with crocodile clips (the only product on test that allowed this), its Apple-friendly USB socket and a two-year warranty. Interestingly, the fan stayed silent when we powered a bulb, suggesting it's powerful enough to cope with a wide range of electrical items. It was slightly heavier at 614g and both leads need to be longer than 72cm to be properly usable.

If you need a heavy-duty 12V to 240V inverter, the Silverline 263764 is a good, if expensive, choice. The 700W maximum output was the highest on test, and the fan didn't kick in until we plugged in the laptop and the battery charger. Another plus point was the quietness of the fan, as it was only 5dB louder than the ambient noise inside the car. We were disappointed by its 66cm leads - the shortest here - and its USB socket that isn't compatible with Apple devices. You might need to bear its weight in mind too; at 975g, it's easily the heaviest product we tested.

If you're a business or trade professional, did you know you can access exclusive discounts on a wide range of products through Halfords Trade Card? Our Trade Card allows members to get the best deals on everything from tools to car parts, inclusive of VAT!

Halfords Trade Card is designed to provide business and trade professionals with access to discounted prices on a wide variety of products available at Halfords from tools, car parts, oils, batteries and much more. Whether you're a mechanic, electrician, or engineer, our Trade Card is intended to get you the products you need, at the right price.

The Halfords Trade Card is primarily aimed at trades people such as mechanics, welders, electrical engineers and other professionals who require regular access to tool and parts. Additionally, students and trainees in automotive courses are also eligible, making it a valuable resource for those just starting in the field.

Exclusive discounts: The primary benefit of Trade Card is the exclusive discounts it offers. Trade customers can enjoy significant savings on a wide range of products, including tools, car parts, cleaning products, oils, and fluids. These discounts are available both in-store and online, making it easy to access the products you need at a reduced cost.

Wide product range: At Halfords, we're known for our extensive range of motoring products, and with Trade Card, you'll have access to everything from batteries and bulbs to professional-grade tools and workshop equipment. We also offer the UK's biggest range of discount car parts.

Online and In-Store Access: The Halfords Trade Card can be used in one of our 400+ stores and online, offering flexibility in your purchases. Whether you prefer browsing the aisles of your local Halfords or placing an order from the comfort of your home or workshop, Trade Card ensures you get the best possible price.
