Sollatek has grown to become a world leader in voltage protection, power control and energy saving with a primary focus on protecting electrical and electronic equipment against unstable and unreliable voltages.

With over 40 years experience, our 50 strong team of engineers design and manufacture innovative products specifically for harsh developing markets where reliability and affordability are important. We operate from several locations in the world providing excellent logistics and a worldwide warranty that can be serviced in many countries by our Local Sollatek Companies (LSCs).

2018 is a very special year for Sollatek Ghana; it's their 25th anniversary! This special anniversary marks a big occasion for not only Sollatek Ghana but also the Sollatek Group. This is the perfect time to reflect on what has been achieved over the last 25 years. Sollatek Ghana has grown massively and is the […]

Detectives from the Fraud Unit of the Criminal Investigations Department (CID) of the Ghana Police Service have arrested six men for allegedly selling counterfeit products in the market. They are Ansong, 49; Daniel Arthur 32; Kwame and Ezekiel Sunday Ani, 42. The suspects were found selling electrical gadgets, mostly Sollatek fridge and television guards believed […]

Welcome to Sollatek support. Here you will find documentation for your Sollatek product, helpful information and answers to common problems. If you require any further assistance, Sollatek Technical Support are available in your area or contact the Head Office.

The PB5000S is designed to provide power when it is needed most. Once installed by a qualified electrician and fitted with the recommended battery, you will enjoy many years of maintenance free operation. Sollatek recommends that you use Deep cycle batteries. Smallest batteries that can be used are 100Ah per battery. 4 Batteries of 12Vdc wired in series are required to provide 100Ah @ 48V. However, 200Ah is the recommended minimum ampere hour capacity per battery to provide a realistic autonomy.

The Ultima LCD comes in 650kVA, 850kVA, 1kVA, 1.5kVA and 2kVA. It is the perfect line interactive UPS for stand alone PCs and SoHo workstations. The Ultima provides a solidly reliable source of back-up computing power. Enabling all computer users to remain wholly productive especially in regions of uncertain electricity supply- Ultima boasts a wealth of superlative features at competitively low price.
