

Sok server rack battery 48v

Sok server rack battery 48v

SOK batteries are renowned for their high-quality construction. The cells, BMS, wiring and busbars are all thoughtfully designed and integrated resulting in a battery that is not only safer, but is more reliable and durable.

Warranty: SOK batteries are manufacturer backed. We have direct support from the SOK team in China, and with the team in New Zealand, we'll work get issues and technical queries resolved promptly.

Introducing the state-of-the-art SOK 48v 5kWh Lithium Server Rack Battery - the ultimate off-grid solar energy solution. The SOK server rack battery is a scalable deep cycle house battery system that is suitable for smaller solar systems such as tiny houses and buses right through to larger scale installations such as houses and industrial applications.

Designed with superior craftsmanship and built to deliver unbeatable performance and value, these batteries are the perfect choice for powering your off-grid system and ensuring that your energy needs are secured.

Our LiFePO₄ batteries are engineered to provide a consistent and reliable power supply. Their sturdy design is made with the highest quality materials and Grade A Lithium Iron Phosphate cells to withstand every day demands of solar systems of any size without any of the downsides of lead chemistry-based batteries.

Current products supporting communication are all Victron equipment via a Cerbo-GX (via Pylontech communications protocol), MPP Solar inverters, Sol-Ark 5k, 8k, 12k & 15K, Growatt inverters, SMA Sunny Island (With appropriate setting changes).

Yes, however you will need to manually set the appropriate settings within the inverter manually, and run these batteries in an open-loop, voltage control-based configuration.

Our Warehouse has moved. Pickups are only available from Nelson by appointment only. Alternatively, we can ship to urban addresses or the nearest NZ Couriers, Post Haste or Mainfreight Depot
