Solar energy is heat and radiant light from the sun that can be harnessed with technologies such as solar power (which is used to generate electricity) and solar thermal energy (which is used for applications such as water heating).

The solar energy market in Ghana is segmented by development. By development, the market is segmented into ground-mounted and rooftop solar. For each segment, the market sizing and forecasts are calculated based on installed capacity (MW).

The solar energy market in Ghana is fragmented. Some of the major players (in no particular order) include Trina Solar Ltd, JinkoSolar Holdings Co. Ltd, SunPower Innovations, Translight Solar, and Redavia Solar Power, among others.

We deliver reliable edge-to-energy generation, connectivity and utilization based on renewable energy industry-standard technology, so your business and home can participate in the evolving energy alternative opportunity. Our innovative-integrated solar power solution offers you smart reliable electricity, and allows you to maximize the value of your clean energy investment and quickly scale down your utility portfolio.

NorthLite will manage all project development activities step-by-step from planning to commissioning of your solar plant including: energy audit, system sizing, procurement, installation, operation, and maintenance. We come along with tailor-made flexible project finance to cover the entire scope the solar system so that your business does not need to cover the capital investment required and will just be able to save money and benefit from a reliable and clean electricity. The total net outcome is that you cut back on electricity recurring tariff.

Beyond project development, we offer smart state-of-the art solar power systems (SPS) engineering services structured to fulfil our client needs and also meet in country regulatory standards for PV solutions. Carry out initialization of project feasibility using the latest data and utility logging and energy audit responsibilities to determine scope and scale of solar system size.

We utilize the best practice in procurement of solar PV products from the right sources. Our selection of components ranges from Tier 1 solar PV modules, inverters, batteries, cables including racking systems and the appropriate certified accessories relevant for completing fine projects.

Solar energy companies ghana

Solar PV construction forms a larger part of our activities at NorthLite since the year 2013. Our qualified installers and trained technical supervisors are posted to site to undertake optimization during Solar PV project construction.

NorthLite brings onboard suitable and patient tailor-made financing to our commercial projects. We partner with experienced project investors to deliver hassle free finance of solar power projects under a short span delivery turn around time.

Either we operate and maintain our own installed project right after commissioning or we can offer operations and maintenance as a service to third party project owners under an O& M standard term.
