

Solar energy for businesses lobamba

Solar energy for businesses lobamba

Tired of skyrocketing electricity bills and concerned about the environment, a business owner in Warrington, England, decided to take action. After our team presented some solar options based on their needs, the client opted for a SolarEdge solar photovoltaic (PV) system

The benefits of this green transition extend far beyond financial gains. By reducing their carbon footprint and improving their ESG performance, the client is making a significant contribution to a more sustainable future. Solar energy is a powerful tool for businesses looking to step into the future and make a positive impact on the planet.

We are proud of our successful collaboration with the Retail sector. This project demonstrates LCM's expertise in solar installations and our commitment to delivering exceptional client service.

Kremena, an MScs International Business and Marketing graduate, leverages her expertise and industry knowledge to drive our critical infrastructure, clean energy, and environmental services. Kremena specialises in campaign management, branding & identity project execution.
