

Solar energy market montevideo

The Uruguayan firms include Berkes, Ebital, Impacto Construcciones, Ingener, MGI SA, Teyma Uruguay and Ventus Ingenieria; together with Cttech, Prodiel and the Chinese companies DTW and Power Construction Corporation of China.

The climate crisis threatens water management and the water crisis in Montevideo, Uruguay, in 2023 illustrates the damage new industrial projects could cause if not thoroughly assessed. With green hydrogen projects gaining international prominence, it is vital they are properly planned.

Volvo said it will offer fuel cell electric trucks by the second half of the decade, while an airport in northern Japan has started working on a feasibility study for local hydrogen production. Uruguay, meanwhile, has presented a new hydrogen strategy.

A Carbon Tracker report estimates 60% of the world's technical solar potential - enough to produce 3.5 exawatt-hours of clean electricity per year - would already be cheaper than fossil fuel if installed. Of the remainder, most would be in sub-Saharan Africa, a region which has the potential to be a global solar and wind powerhouse.

Inverter company ABB supplied equipment for a second PV plant at the Artigas base. Its collaboration with the Uruguayan Antarctic Institute helps facilitate climate change research.

The sixth edition of Intersolar South America in Sao Paulo has showed unequivocally that both international and Brazilian players firmly believe in the big potential of the Brazilian solar market, despite the current political uncertainty and usual economic challenges. Overall, the event was larger and of a higher quality than last year, while in the absence of future dates for new large-scale solar auctions, and stable conditions for private PPAs, DG is emerging as the market's main driver.

The Natelu solar plant was built near Mercedes, in the Uruguayan department of Soriano. The project was financed by the Inter-American Development Bank (IDB) and the Canadian Climate Fund (C2F).
