## Solar gel batteries for sale

Exceptionally reliable, this long-lasting Group 8D 12 volt battery is very resistant to hot and cold temperatures. The completely maintenance free, sealed construction eliminates periodic watering, corrosive acid fumes and spills. Electrolyte will not stratify, no equalization charging required, allowing faster recharge.

The Deka 8G8D features increased durability and deep cycle ability for heavy demand applications. Stand loss of less than 2% per month means little deterioration during transport and storage. Transports easily and safely by air.

Advanced Made in America technology with the most modern computer-aided design and manufacturing techniques combine to make Deka's Solar Gel Batteries the standard by which all other batteries are measured.

Deka Gel Cell Batteries are ideal for remote off-grid solar applications such as UPS battery backup systems, seismic sensing, wireless communications, infrared security, street lighting, obstruction lighting, wildlife monitoring, Intelligent transportation systems and much more.

Capacity vs. Operating Temperatures: Above are the changes in capacity for wider ambient temperature range, giving the available capacity, as a percentage of the rated capacity, at different ambient temperatures. The curves show the behavior of the battery after a number of cycles.

Solar Electric Supply not only supplies the latest Deka Solar batteries at a discount price, we also design and supply enclosures and off-grid solar systems engineered specifically for industrial and commercial applications. We support our customers with a friendly knowledgeable staff that is here to answer your questions about any battery, battery enclosure or energy storage system.

One standout feature of LCPC batteries is their use of corrosion-resistant alloys. These materials are carefully selected to withstand corrosive environmental conditions, ensuring the batteries' durability, especially in demanding environments such as marine or industrial settings.

LCPC batteries also feature a radial grid design that enhances both structural integrity and electrical performance. This design enables the batteries to endure physical stress while maintaining a consistent and dependable power supply, even in challenging conditions.

With a commitment to quality control and advanced manufacturing processes, LCPC batteries consistently meet or exceed industry standards. Their improved acid control capacity extends their cycle life, making them an excellent choice for applications involving frequent charge and discharge cycles, such as renewable energy systems or uninterruptible power supplies. LCPC energy storage gel batteries offer dependable and durable

energy storage solutions.

The 12V Gel Battery is a compact, reliable energy storage solution. It operates at 12 volts and is maintenance-free. This battery is well-suited for various applications, including mobile setups like RVs and boats due to its shock and vibration resistance. It's also excellent for renewable energy systems and backup power, thanks to its deep-cycle performance. Plus, with gel electrolyte technology, it's safe, eco-friendly, and built to last. Trust the 12V Gel Battery for your power needs.

Adopting corrosion-resistant multiple alloy, radial grid, 4BS high-temperature and high humidity curing core technology, combined with advanced manufacturing processes, to ensure consistent product performance.
