

Solar grid and inverter systems

Solar grid and inverter systems

Switch to us and have all the power you use matched back to 100% renewable electricity from our community of over 2,500 independent generators. Including smart EV tariffs, for lower cost charging.

Good Energy's latest rating from Citizen's Advice is 2.9 out of 5 stars. This rating is worked out across three different categories, including contact waiting times(3*), complaints (2*) and customer commitments (3*).

On this page you can see the rates of our current and historic tariffs. If you're looking for information about the features of the different tariffs that we offer, including the difference between fixed and standard variable tariffs, view our energy tariff explainer.

It takes a lot of work to genuinely support renewable energy. From buying power directly from independent generators, to working hard to match our supply with what our customers are using.

We price our tariffs at a level that enables us to keep doing this work sustainably, long term. When you're on a Good Energy tariff, you can trust that you're supporting green heroes who are making a difference - like Jo and Bev from Tongue Gill Hydro in Cumbria.

You can find details of all our tariff rates below. We'll always let you know if our prices are changing and explain why this is happening. Thank you for standing up for our planet and helping tackle the climate crisis.

We take a whole- home approach to your installation. Our in-house green heating specialists design, install and look after your heating system to make sure getting efficient, green and comfortable heating is as simple as possible.

Our support doesn't finish when your install does. With 10-year warranties and remote, digital check-ins on your heat pump's performance, we're on hand to keep your heating in top condition.
