

Solar installers in ghana

Solar installers in ghana

Global warming of 1.1 degrees Celsius is leading to unprecedented climate changes, from rising sea levels to more frequent extreme weather events, impacting ecosystems and communities worldwide.

Since our inception in 2009, we've been committed to renewable energy solutions, providing high-quality solar equipment and services to thousands of homes and businesses. Together, we've helped save massive CO2 emissions.

Our commitment to sustainable energy solutions is evident in our industry-leading manufacturing technology and continuous investment in raising the bar for green energy initiatives in Ghana.

We set out with a mission to make renewable energy accessible. We found there was a need to do things differently by advancing the know-how to realise our ambition. So we evolved with innovative ways of realising energy access through knowledge transfer.

As a women-led social enterprise, Power Sisters has affirmed high-level support for advancing gender equality on the road to ensuring universal energy access. Over 80 per cent of WIRE's board is comprised of women leaders from the finance, technology and renewable energy sectors.

We design and supply top-tier solar energy systems, focusing on reducing energy usage and fostering sustainable electricity generation. Our services extend from sophisticated solar PV systems for homes and businesses to dynamic public space lighting, ensuring every installation meets the highest standards of quality and efficiency.

We Green Energy, a prominent Belgian company in the renewable energy sector, is excited to announce its official entry into the African market through a strategic partnership with HMD. This collaboration marks a significant milestone in developing green energy solutions in Ghana, aiming to provide accessible, sustainable, and clean electricity to all.

With a clear mission to enhance energy accessibility, We Green Ghana is set to implement comprehensive green energy supply solutions tailored for both businesses (B2B) and individuals (B2C). By leveraging advanced technologies, the company intends to reduce reliance on traditional energy sources and combat energy insecurity, particularly in rural areas where access to electricity remains challenging.

This expansion into Africa is aligned with We Green Energy's global vision for a sustainable energy transition and reducing carbon emissions. By offering a combination of B2B and B2C solutions, the company aims to serve large businesses and households, thereby enhancing the country's energy resilience and self-sufficiency.
