At Sinetech, we understand that an uninterrupted power supply during load shedding means homes flourishing and businesses thriving. That's why we offer a comprehensive range of high-quality and cost-effective solar inverters, designed to meet your power needs whether it's for your home or office. Discover the benefits of having a Sinetech inverter as your trusted energy companion.

The Growatt SPF 5000 48V Hybrid Inverter is a dual function off grid solar inverter; integrated with a MPPT solar charge controller; a high frequency pure sine wave inverter with a UPS function module all in one machine

Ideal for powering TVs, decoders, computer equipment and appliances that consume more energy such as fridges, microwaves, washing machines, dishwashers, kettles and toasters.

Solar Max inverters were specially designed for off-grid applications featuring high efficiency, extremely low self-consumption power as well as outstanding reliability. They provide continuous rated power at 40°C and 80% even at scorching temperatures up to 60°C. Combined with outstanding overload capability, the Solar Max inverter will comfortably power large loads such as air-conditioners, refrigerators and water pumps in tropical regions.

Solar Combi is a small independent electrification system designed for rural areas, satisfying basic needs such as light, TV, ceiling fan, small fridge, water pump, etc. Solar Combi integrates multiple functions which make the installation quick, easy and cost-effective. Proven high quality and industrial leading efficiency make it a perfect product for rural electrification.

Inverters with batteries are a crucial component of solar-powered systems because they convert the DC (direct current) electricity generated by solar panels or stored in a battery into AC (alternating current) electricity compatible with the power grid.

Choosing the best inverter that suits your specific needs involves understanding different types of inverters. Sinetech offers three types of inverters, each ideal for different applications.

Sinetech's range of power inverters for sale caters to residential, commercial, and industrial applications. Explore our selection of Pure Sinewave, Modified Sinewave, and Hybrid Solar inverters to find the perfect fit

Solar inverters for sale south Africa

for your needs.

To find out what inverter you need to run your home you first need to calculate the total wattage you need by adding up the wattage of all devices you will run on the inverter. Once you have this number, opt for an inverter twice the total wattage needed to stay safe and avoid overloading it. It's important to note that the size of the inverter you are looking for will impact the inverter price and may limit the size if you are considering a portable inverter.

Most inverter batteries can last between 5 and 10 hours when fully charged, but how long an inverter battery lasts depends on your electrical load, the battery capacity, and the consumption of the UPS itself.
