Solar panel exhibition in ghana

Power Energy Ghana is set to hold the third edition of the complete international exhibition of the power energy electrical from Wednesday, November 6 to Friday, November 8, 2024 in Ghana, at the Accra International Conference Center.

The expo will be organised by BIG4SURE EVENTS FZCO UAE with Wegvoraus Exhibitions, under the auspices of Ministry of Energy Ghana with the support of Ministry of Trade and Investment of Ghana. Power and Energy is one of the most significant sectors supporting the growth and sustainability of the Ghanaian economy and industries and also contributing significantly towards the income of the country by the way of electricity exports.

The event is well received and supported by key stakeholder organizations and association in the country like Ghana Electrical Contractors Association, Ghana Electrical Dealers Associations, Ghana Unions of Traders Association, Africa Continental Engineering & Construction Network, Energy Chamber of Ghana, Ghana Chamber of Construction Industries, Ghana Energy Commission, Ghana Standard Authority and other stakeholders including international partners like CCI France Ghana etc.

The event will bring together the manufacturers, exporters, wholesalers, dealers and distributors of the power electrical energy equipment's, gadgets and products, including transformers, wires, solar panels, batteries, invertors, generators, to everything in the electrical industry, in the West African region in Ghana, hosting close to 100 exhibitors in the expo from India, China, Turkey, Nigeria, UAE, France, Spain, UK, Ghana and other countries and 4000+ visitors from Ghana and West Africa.

The event will have co-located event - Lighting & Smart Home System Expo and Conference organized in partnership with Ghana Electrical Contractors Association, that shall bring in the lighting and home system companies in the sector to exhibit and discuss business with the exhibition. The conference will have sponsors and speakers including Energy Commission representatives and technocrats in the sector stressing the need for lighting and its smart solutions for all our infrastructure facilities.

The exhibition is expected to address the power and energy supplies demand and issues in the country so that robust power sector in the country can be built and developed, that goes hand in hand with the vision of the Government of Ghana to have a strong industrial support infrastructure for export and job creation.

Ghanian and West African companies will have the opportunity to connect with the manufacturers and suppliers exhibiting in the event, one to one with prefixed meetings scheduled and get to know the profile of exhibitors in advance to understand and prioritize whom all they wish to meet with for potential collaboration, partnership distribution arrangement, joint venture and investment tie ups.
