

Solar panels thailand

Solar panels thailand

For the past number of years, we've catered to the growing demand for eco-friendly solar energy sources for residential and commercial installations alike. We strive to provide some of the best solar rooftop installation service at the best prices. Solar energy is abundant especially with the tropical climate of Thailand. Let's get you started with a cost-efficient solar panel Thailand installation service today.

Our experience in the industry coupled with our precise attention to quality makes us one of the best choices in solar energy Thailand. Our goal is to design and bring forth Thai solar power solutions at price points which are competitive yet reasonable. Rooftop solar installations have always been popular; however, if you need ground-mounted panels, you may consult with our team as well. Solar Force has been supplying the best solar panels roof BKK in terms of design, practicality and innovation.

As one of the leading Solar Developers in Asia, CleanMax develops Solar Plants on a turnkey Private PPA basis, delivering solar power supply on a per-kWh basis (pay as you go) to corporates and institutions. As one of the pioneers in the Private PPA sector, CleanMax was established in 2011 and has since then executed 1000+ MW of renewable energy projects in South Asia and in the Middle East. CleanMax provides turnkey solutions, deploying the latest technology, with robust quality, safety and legal compliance processes, along with rapid project execution.

We are now in Thailand, carrying our legacy as the preferred sustainability partner for leading corporates. We are committed towards promoting Thailand's Vision of delivering sustainable electricity services at a world-class level of reliability, efficiency and safety.

Whether your aim is to cut energy costs, reduce your carbon footprint or accomplish your sustainability goals, CleanMax has a solution for you. We provide on-site solar power with zero investment, at a discount to grid tariff.

Avoid the investment cost and the risk of plant performance. Pay only for the energy generated, typically 30% less than your grid electricity tariff. With zero investment cost, the savings start from day 1! CleanMax will invest, design and build the solar power plant as well as perform free lifetime Operation & Maintenance to ensure the maximum energy production over the life of the system.

"I am really happy that Knorr Bremse CVS Pune could realize a project to install solar panels which are allowing the plant to run independently with solar energy power during day time."

Augment Infrastructure is a US-based fund manager that invests in infrastructure companies globally on behalf of its investors. Augment Infrastructure focuses on growth infrastructure strategies, primarily in emerging markets, across sectors such as power, water and sanitation, telecom infrastructure and transport.
