

Solar pool heaters for above ground pools

Solar pool heaters for above ground pools

Unless you live in a place with warm temperatures year-round, you will have a limited pool season due to low winter temperatures. Using a pool heater is the best way to combat the weather and expand the season.

The Smart Pool SunHeater Solar Heating System is a great solar pool heater for inground and above ground pool owners. It uses polypropylene materials and features 80 square feet of panels. Each panel array is four feet wide by 20 feet long.

You can mount this solar heater on a roof or on a rack. Unfortunately, the installation kit is sold separately, but with the kit, you should be able to follow the instructions to properly install the panels. This Smart Pool SunHeater is able to heat up a pool by more than 10 degrees in some circumstances.

The Smart Pool SunHeater Solar Heating System can raise your pool temperature by up to 6 to 10 degrees Fahrenheit. I have found that it does an excellent job at heating, and it will often increase water temperatures by much more than 10 degrees on sunny days. But at the end of the day, it all depends on your location and how much sun the heater gets each day.

This solar pool heater is flexible but durable. It uses polypropylene materials, making it strong and resistant to moisture and degradation. Installed properly, you can be sure these panels will last you years.

If you have never installed a solar heater before, don't expect an easy task. Putting the panels on the roof is the easy part; the issue is the plumbing. If you have some basic DIY knowledge, you may be able to get away with installing these panels yourself, but many testers have had to hire a plumber to do the final touches. Unfortunately, the installation kit is sold separately, but once you have the kit, the manual is easy enough to follow.

The Smart Pool SunHeater Solar Heating System is a great solar pool heater for the price. You get a quality product that will heat your pool water time and time again with the help of the sun. Solar pool heaters, in general, will save you tons of money in the long run as there are essentially no running costs.

This solar pool heater is rated at 4.2 out of 5 stars, with almost 80% of testers rating it 4 or 5 stars. Testers praise the Smart Pool SunHeater Solar Heating System for providing them with a cheap way to heat up their pools. Most testers experience their pool waters rising by up to 10 degrees Fahrenheit.

Unfortunately, it seems that some testers have had negative experiences with receiving faulty products from the company. So, ensure you properly inspect all pieces that come with this pool heater so that you can get replacement parts - just in case!

Solar pool heaters for above ground pools

The Fafco Solar Bear is a great solar pool heater that can heat your above ground pool up to 10 degrees Fahrenheit, which is no small feat! In doing so, this solar heater will extend your swimming season by up to a couple of months. This solar heater comes with various mounting options, so you can pick the one that works best for you, depending on what would get the most sun.

The Solar Bear comes with extra-large tubes, so it can work with any pump. No need to buy another pool pump to support this solar heater! With that said, although this product comes highly rated, keep in mind that you'll need to buy connections separately in order to connect your pool to the Solar Bear.

The Fafco Solar Bear Economy Heating System features extra-large tubes to allow for your full pump strength to run through it. The heater provides an increase in water temperature of 5 to 10 degrees, so you'll be able to extend your swimming pool season to the spring and fall with no issues.
