

Solar power generator ghana

Solar power generator ghana

Ghana regularly experience power shortages and regular interruptions in main grid service, which, in some instances results in damaged equipment or loss of valuable data. Therefore, the need for back up energy has never been greater both at a domestic and business level.

We offer UPS back up and power monitoring units to support our customers in accessing reliable electricity supply to operate sensitive computer equipment. Additionally, we also install and maintain generator sets ranging from 15 KVA to 2500 KVA.

We also supply, install and maintain Diesel Engine Power generating sets for a wide range of applications from 7kva to 2500kva, standby or continuous usage, open or with soundproof canopy, fixed or mobile.

Synchronized systems are also available for small and large applications. Additionally, the control panels we supply are designed to meet specific market needs enhancing efficiency and minimizing costs.

Ghana regularly experience power shortages and regular interruptions in main grid service, which, in some instances results in damaged equipment or loss of valuable data. Therefore, the need for back up energy has never been greater both at a domestic and business level;
