## Solar pv module

UKSOL is the British solar energy specialist that produces and delivers affordable, high quality solar panel technology through our global network of installation and distribution partners, supported by our secure 30 year UK warranty.

UKSOL, the UK-based solar module manufacturer, has successfully completed the Sedex SMETA (Sedex Members Ethical Trade Audit) of its solar module production facility in China. The audit, conducted by an independent third party, reaffirms UKSOL's commitment to maintaining the highest standards of ethical business practices, labour rights, and environmental responsibility throughout its supply chain.

UKSOL, a leading British solar panel supplier, has announced its official membership of the Solar Stewardship Initiative (SSI), a global effort aimed at promoting sustainable and responsible practices in the solar energy industry. This strategic move underscores UKSOL's commitment to environmental responsibility and transparent supply chains in the rapidly expanding renewable energy sector.

A solar panel is a device that converts sunlight into electricity by using photovoltaic (PV) cells. PV cells are made of materials that produce excited electrons when exposed to light. The electrons flow through a circuit and produce direct current (DC) electricity, which can be used to power various devices or be stored in batteries. Solar panels are also known as solar cell panels, solar electric panels, or PV modules.
