Solar street light price in ghana

**IP65 Waterproof:** The IP65 waterproofing and 10K high-voltage surge extend protection against voltage spikes and fit severe weather conditions like humid environments, sandstorms, and snowstorms.

**Wide Application:** This amazing light is ideal for streets, parking lots, driveways, backyards, residential areas, public entrance lots, roadways, walkways, gas stations, sports arenas, and similar locations.

**5-Year Warranty:** Lepro, your one-stop lighting shop, is one of the largest light manufacturers worldwide. We supply our customers with free technical support and an exceptional 5-year warranty to cover all technical problems and product defects.

Taiwan-based electronics manufacturer Para Light Electronic has launched a compact solar LED streetlight with integrated PV panels and battery to provide up to 15 hours of area-lighting for pedestrian walkways and roads.

Taiwan-based electronics manufacturer Para Light Electronic has added a new integrated solar light emitting diode (LED) streetlight for pedestrian walkways and roads to its line of outdoor lighting products.

A die-cast aluminum housing unit integrates a 50 Ah battery with 12.8 V capacity, four Philips LED panels, and a 100 W and 8 V solar panel. It measures 1,420 x 420 x 240 mm. The solar panel is made with bifacial monocrystalline silicon cells.

"We purchase entire solar panels based on specific requirements, and do not source individual solar cells separately. Our solar cell technology is supplied by our cooperative suppliers," a spokesperson from the company told pv magazine.

The PD-BJ200W reportedly provides full light for 15 hours, and up to 48 hours in energy-saving mode, with a charging time of 6 to 8 hours. The operational temperature is -30 C to 60 C. The LED color temperature is 3,000k to 6,000k.

Para Light sells a range of integrated street lights. Its other PV products include solar-powered flood lights, garden lights, and decorative lights. "Products are sold globally via importers," the spokesperson said.

Some solar street lights go off after a year, whereas others remain bright for ten years. Have you noticed this? Thousands of All-in-One solar street lights have been installed by us in various regions. While some installations were a big success, others were a complete failure. Choosing the appropriate all-in-one solar street light is usually what makes the difference.
