

Solar thermal panels manufacturers

Solar thermal panels manufacturers

Capturing sun light (UV-Ultra Violet) even on cloudy days, these are not electrical or gas but innovative solar thermal water heating panels. If you have a steam boiler, or use more than 300 gallons a day of hot water, you may be able to save money with our UV Solar designs.

The federal investment tax credit is the United States federal government provides an excise break that allows you a 30% rebate on the total price of your solar power system. We will use small numbers as an example. Let's say your solar thermal collector system cost \$500,000.00, you will get a 30% tax credit on that cost, which is \$150,000.00.

Accelerated depreciation is where you write off the entire cost of your commercial solar thermal panel system in the first year. Normally depreciation is spread over the lifetime of the item.
