Solar water pumps suppliers in ghana

IWMI West Africa has been exploring solar irrigation initiatives for some time now and we are very enthused to say having a reliable partner from the private sector has been absolutely phenomenal in aiding us draw the right lines in promoting irrigation in the communities.

We took a big chance to work with Pumptech Limited to lead an innovative water supply systems to various small towns in Ghana and it has paid. PTL has proven its reliability, resilience, excellence and mastery in the industry. Their services are worth every investment resource.

Just had a new solar system installed (11 panels and 2 batteries). Must say I was very impressed by the professionalism and quality of this company. Everything happened as it should have done. All the people from office staff to installers seem to know their subject well and everyone without exception was very pleasant to deal with. No hesitation in recommending them to others and I already have.
