

SolarEdge overvoltage surge protection

SolarEdge overvoltage surge protection

If you need help pricing up your next large project we would love to help! Or maybe you are looking for items not already on our site?, we can source most well-known electrical wholesale brands at competitive prices. Please complete the details below and we will respond ASAP.

In the critical field of power distribution and circuit protection, surge protection devices are designed to protect sensitive equipment from unexpected surges, ensuring the longevity and reliability of the installations.

To create a robust and secure electrical system, start with dependable consumer units for efficient power management. Enhance your control and automation with contactors & time switches, and maintain an organised setup with consumer unit accessories and din rail enclosures.

For comprehensive circuit protection, incorporate MCBs, RCBOs, and RCDs to prevent overloads, short circuits, and earth faults. If you're working with older systems, reconditioned credit meters provide a reliable solution. Complement your setup with rotary isolator switches, switch fuses & disconnectors, and switch isolators to ensure safe disconnection and isolation during maintenance.

If you require a faster delivery timeframe, please reach out to us and one of our customer service representatives will assess inventory and supply chain availability to determine if expedited delivery is possible for your items and location.

o Orders containing Solar Panels (Solar Panel Delivery Fee): orders up to 50 panels will be dispatched on a pallet and incur a ?120 ex-VAT delivery charge** (due to their size and fragile nature).

Our shipping carriers require a physical street address for deliveries. If you have a P.O. box or APO/FPO address, please provide a valid street address that our carriers can deliver to instead when you place your order.

o Long items orders: If your order contains items longer than 1.2m, it will be shipped through FedEx. Because of their special handling process for oversized items, FedEx deliveries can sometimes be delayed.

o Bulky items orders: For bulky items like storage heaters that require a pallet, we use a specialised freight partner for delivery. They will contact you directly to schedule a delivery date that works for your location. We recommend having extra help available to unload palletized items from the curb side drop-off.

o Orders to Remote Areas: For deliveries to the Scottish Highlands and Islands, we typically cannot provide next-day shipping due to the remote location. Standard delivery time to these zones is 2-4 days after shipment.

SolarEdge overvoltage surge protection

We want to ensure your shipment arrives safely and on time, so if you need specifics for your area, need to make special arrangements, or have any questions about delivery don't hesitate to contact us or ask to speak to a human service agent on our live chat (Mon-Fri 08:00-16:30).
