

Sollys Tyres amp MAG Wheels

Sollys Tyres amp MAG Wheels

Rocket We wanted every wheel we produced to be special, to fit a vehicle like an original wheel, to originate new designs and technology, they had to have full TÜV approval and ABE for sale in Germany, oh… and they had to look better than anything else.

The Rocket is a unique derivative of a star spoke design that concaves slightly to the centre and its trademark rim turbo grooves. The Rocket also has an all-new feature in its concave centre cap, designed to mimic the rim grooves, the centre cap adds character and the opportunity to customise the look of the wheel.

As part of this package, your new alloy wheels are fitted with either 275/35/20 102 XL or 245/45/20 103 W value-branded tyres, coming to you fitted, valved, balanced and checked. [Click Here](#) to view the wheel only package.

4x Selected CV Rated Value Branded Tyres (Fitted)*Please note these wheels Require Original Volkswagen Wheel Bolts*Please Note - This sale is for wheels & tyres

Wolfrace made its debut with the pioneering Slot Mag alloy wheel in 1971, the first polished alloy wheel to make waves in the European market. From that point forward, the brand has maintained its position as an industry leader, offering some of the most sought-after and dependable alloy wheels on the market. All Wolfrace 71 alloy wheels are fully load-rated for use with the VW Transporter while embodying the aesthetics of a lightweight, high-performance alloy wheel.

These alloys boast top-notch finish quality, precise machining, and, crucially, a luxurious appearance. Wolfrace 71 wheels would be a perfect fit even for the most upscale camper builds or show vans. These wheels are particularly well-suited for luxury vehicle owners who appreciate both quality and style. A restyle using a full gloss Raven black colour scheme and muted tone centre cap, gives a clean and slick style.

The Dortmund wheel from Wolfrace is one of our favourites to date. The sharp design makes for an aggressive yet classic looking wheel by not being over styled. The one-piece alloy boasts a 5 split-spoke design, allowing the large brakes of the Transporter to be on display.

We think these wheels would really look the part on any T5 or T6 with a max load of 875kg per wheel. Your new alloy wheels are fitted with 255/35/20 102 XL or 275/40/20 106 XL value branded tyres, coming to you fitted, valved, balanced and checked.
