## Specialized solar systems ghana

Established in 2000 as part of the Specialized Heating & Cooling Group, Specialized Solar & Electrical is an independent family-owned business based in Melbourne with six offices in regional Victoria and NSW.

Our clients include some of the largest organisations operating in Victoria and NSW including the SEC, Solar Savers & Energy Savers . But you're just as likely to find us installing solar on a private home, rewiring a shop or talking energy efficiency with a small business.

The real difference that Specialized Solar offers is that the whole process – from start to finish – is delivered by a friendly, helpful and knowledgeable team who go the extra mile to ensure that your solar installation is hassle-free.

Because we are 100% confident in the work of our installers, we provide a 15-year Workmanship Warranty that's ten years longer than the industry standard. Plus, we stand behind our solar output estimates, with an exceptional 15-year Power Performance Guarantee that your system will generate the power it's supposed to - and if it doesn't - we'll fix it at our cost.

Any solar panels we install come with a 25-year product warranty, beating the typical 10-year solar panel product warranty hands-down. All our solar panel brands also come with a 25-year solar panel performance warranty.

And because we're one of the select few accredited Tesla Powerwall installers for their VPP program, we can access a market-beating 15-year product warranty for your Powerwall (when the norm is 10-years). Our other battery brands also have you covered for a minimum 10-years parts and labour.

With every solar system we include comprehensive solar monitoring with both generation and consumption monitoring. It's the tool you need to see how much money your solar is saving you – and spot any issues which can then be fixed under warranty.

We're proud to be rated so highly because, at the end of the day, it's what our customers say that counts. Here's a sample of testimonials from householders and businesses who've gone solar with us. Check out our case studies page for more.

Installing a solar system is just the start. The team at Specialized Solar are geared up to provide a wide range of after-sales support and services to ensure you get the most from your system including:

With solar and battery systems being long-term investments, you need a solar company who has a long-term outlook and the financial strength to honour its warranties. Plus you'll want a company that is

## Specialized solar systems ghana

committed to helping you get the best possible value over the full lifetime of your system.
