

Sunshine Solar Panels 100W 12V Mono Super-Slim

Sunshine Solar Panels 100W 12V Mono Super-Slim

The Sunshine Solar panels are ideal for keeping 12V batteries topped up. Solar panels are suitable for a wide range of applications however the most common uses for our 100 watt solar panel includes supplementing the leisure battery power in caravans, motorhomes and boats.

With a Sunshine 100W solar panel you could expect to generate around 29 amps per day when used in conjunction with a PWM solar charge controller and around 33 amps per day with an MPPT solar controller during the summer months. Multiple panels can be connected to acquire higher power if needed.

Please Note: If you are connecting multiple panels together you may need a bigger solar controller if you are unsure which you require or have any other questions please call 01508 488188 then Option 4 for Technical. For the best performance we would recommend 4mm single core cable is used the same as the existing cable already attached to the solar panel junction box. The most efficient method of extending the existing cable is by using 4mm single-core cable fitted with a pair of compatible MC Type 4 Solar Connectors.

Our aim is to become the UK's preferred online retailer of quality renewable energy products and accessories. Our ethos is one of outstanding customer service and competitive pricing.
