

Sunshine Solar Panels 160W 12V Crystalline

Sunshine Solar Panels 160W 12V Crystalline

Our 160W solar panel is the most powerful of the Sunshine Solar range for 12V battery charging if you are looking for faster power generation this solar module will deliver. The high wattage output combined with high efficiency crystalline cells make this solar panel of particular interest for motorhome uses, static caravans, mobile homes, live aboard boats where larger power requirements are generally required.

With a Sunshine 160W solar panel you could expect to generate around 44 amps per day when used in conjunction with a PWM solar charge controller and around 53 amps per day with an MPPT solar controller during the summer months. Multiple panels can be connected to acquire higher power if needed.

For the best performance we would recommend 4mm single core cable is used the same as the existing cable already attached to the solar panel junction box. The most efficient method of extending the existing cable is by using 4mm single-core cable fitted with a pair of compatible MC Type 4 Solar Connectors.

Our aim is to become the UK's preferred online retailer of quality renewable energy products and accessories. Our ethos is one of outstanding customer service and competitive pricing.
