

Tesla uk site

Tesla's Model Y builds on Model 3's success, offering SUV styling and proportions for those looking for a sport utility vehicle. Like every Tesla, Model Y and Model 3 combine safety, efficiency, performance, utility and technology. The Tesla DNA combines a low centre of gravity, rigid body structure and large crumple zones provide unparalleled protection. Safety is engineered into the design of every car at Tesla meaning that Model Y is built on Model 3's platform, which scored top marks for safety globally.

Model Y's aerodynamic design alongside leading battery technology makes it the most efficient SUV there is in terms of energy usage, meaning you can achieve better range with less energy. Model Y provides maximum versatility. Each rear seat folds flat independently, creating flexible storage for luggage, furniture, skis and more.
