

# Top 10 lifepo4 battery manufacturers

## Top 10 lifepo4 battery manufacturers

Lithium iron phosphate (LiFePO<sub>4</sub>) cells have emerged as a popular choice for energy storage solutions, offering exceptional safety, long cycle life, and high energy density. As the demand for LiFePO<sub>4</sub> continues to grow, driven by the increasing adoption of electric vehicles and the need for grid-scale energy storage, it's essential to stay informed about the top manufacturers in the market. In this article, we'll explore the 10 leading LiFePO<sub>4</sub> cell producers to watch in 2024.

**Business Scope:** BYD is a Chinese multinational company that specializes in battery technology, electric vehicles, and renewable energy solutions. As one of the largest LiFePO<sub>4</sub> cell manufacturers in the world, BYD's LiFePO<sub>4</sub> cell product line covers multiple fields such as electric vehicles, energy storage, and electronic products.

**Key Products:** CATL also has a large market share in the field of LiFePO<sub>4</sub> cells. CATL's LiFePO<sub>4</sub> cells are safe, have a long life, are low in cost, and are environmentally friendly. In addition, CATL attaches great importance to the research and development of cutting-edge technologies, involving new battery materials (such as solid-state batteries), high energy density batteries, and fast charging technologies.

**Business Scope:** Ufine Battery is a well-known professional lithium battery manufacturer in China. From lithium-ion batteries, to lithium polymer batteries, to LiFePO<sub>4</sub> cells, and LiFePO<sub>4</sub> back, cylindrical batteries, high-temperature batteries, and low-temperature batteries. Ufine's lithium batteries are widely used in consumer electronic devices, power tools, and medical equipment. The average daily production of 100,000+ batteries has provided high-performance lithium batteries to thousands of companies around the world.

**Key Products:** In addition to the high energy density, long cycle life and enhanced safety characteristics of LiFePO<sub>4</sub> batteries themselves, unlike other large battery companies, Ufine has a more flexible battery customization solution, from LiFePO<sub>4</sub> battery size, capacity, voltage, weight, etc., can perfectly meet the needs of power equipment according to customer needs. In addition, 24X7 online customer service support and perfect after-sales service make customers in dozens of countries around the world choose Ufine.

**Business Scope:** Guoxuan High-Tech is a Chinese battery manufacturer that specializes in the production of LiFePO<sub>4</sub> cells and battery packs. In addition to battery manufacturing and production, Guoxuan High-Tech also provides services such as recycling of used power batteries, operation of charging infrastructure and manufacturing of power equipment.

**Business Scope:** A123 Systems is an American battery technology company. A123 Systems specializes in high-performance lithium iron phosphate (LiFePO<sub>4</sub>) battery solutions for various sectors, including automotive, industrial, and energy storage. They focus on safe, durable, and efficient batteries ideal for electric vehicles, grid storage, and industrial applications.

# Top 10 lifepo4 battery manufacturers

**Key Products:** A123 Systems produces a range of LiFePO<sub>4</sub> cells, including cylindrical, prismatic, and pouch formats, serving diverse markets such as electric vehicles, grid-scale energy storage, and industrial applications. The company's LiFePO<sub>4</sub> cells are known for their exceptional power density, fast charging capabilities, and long cycle life, making them a popular choice among industry players.

**Key Products:** Murata's LiFePO<sub>4</sub> (lithium iron phosphate) battery line is characterized by high safety, durability, and efficiency, especially in harsh conditions. These batteries are tailored for energy storage, industrial applications, and electric mobility. Known for their long cycle life, Murata's LiFePO<sub>4</sub> batteries deliver stable voltage and reduced maintenance, positioning them as reliable options for renewable energy storage and backup power systems.

**Business Scope:** Tianneng Power is a Chinese battery manufacturer specializing in producing LiFePO<sub>4</sub> cells and battery packs. The company's focus on safety, sustainability, and energy efficiency has made it a prominent player in the growing energy storage and electric vehicle markets. Tianneng Power's commitment to research and development has enabled it to develop innovative LiFePO<sub>4</sub> cell technologies that address the evolving needs of its customers.

**Key Products:** Tianneng Power's LiFePO<sub>4</sub> cell portfolio includes a variety of prismatic and pouch formats designed to meet the demands of the electric vehicle, energy storage, and industrial sectors. The company's LiFePO<sub>4</sub> cells are recognized for their exceptional safety characteristics, long lifespan, and reliable performance, making them popular among industry players.

**Business Scope:** K2 Energy Solutions is an American battery technology company that has established itself as a leading manufacturer of high-quality LiFePO<sub>4</sub> cells. Founded in 2006, the company has developed a strong expertise in the design, engineering, and production of advanced lithium-ion battery solutions. K2 Energy Solutions' focus on innovation, safety, and reliability has made it a trusted partner for customers across various industries, including renewable energy, transportation, and industrial applications.
