Also known as gasoil, regular fuel is a volatile mixture of liquid hydrocarbons, generally containing small amounts of additives, suitable for use in spark-ignition internal combustion of engines. It can be used in the construction industry for small scale projects.

Product BenefitsOur petrol fuel does not contain lead as an after-burn product which causes biological poisoning to human beings. It does, however, have high octane rating which is 91 making it suitable for many modern petrol engines.

Illuminating Kerosene (paraffin) is a combustible liquid commonly used as heating fuel and domestically for cooking and lighting. It has several industrial uses for example it is widely used as a solvent.
