

## Type 2 connectors mennekes

### Type 2 connectors mennekes

A Mode 3 charging cable is a connecting cable between the charging station and the electric vehicle. With the MENNEKES Mode 3, Type 2 charging cable, you can easily charge all vehicles with a Type 2 plug - the MENNEKES Type 2 plug is standard in Europe! - Connect to public charging stations or to wallboxes with a charging socket.

MENNEKES charging cables are available in different versions. Whether as in spiralized form or also a straight variant - our charging cables impress due to their robust quality and absolute long-term durability. Plugs and connectors are cast, which means that they can even be run over by a car without breaking. The cables are protected against dust and water. Plugs and connectors have protective flaps as standard in order to reliably prevent contamination and moisture in the interior.

Thanks to four meters of cable length, you can charge your car even in hard-to-reach places or over longer distances. Due to its spiralized shape, the cable can be plugged in without touching the ground. Thus, the Type 2 charging cable is well visible when plugged in and does not get dirty. In addition, it has the advantage that it can be stored even more space-saving.

With the MENNEKES charging cable type 2 you can easily connect all vehicles with type 2 plug to public charging stations or to wallboxes with charging socket. Robust quality and a drive-over safety ensure a long-lasting use. Type 2 is the European standard charging plug developed by MENNEKES. Depending on the variant, charging capacities of up to 22 kW (400 V, 32 A) are possible in private households, depending on the vehicle and the charging station.

A mobile Mode 2 charging cable, also known as an emergency charging cable, can be used to charge up an electric or hybrid vehicle using any standard electrical outlet (Schuko) or CEE receptacle whenever there is no permanently installed charging station available. In this case, the control unit assumes all safety-related functions such as for example

Mode 2 charging cables from MENNEKES deliver charging power up to 3.7 kW. They are user-friendly as no further settings need to be made. The enclosure is so robust that it can even be run over by a car. The protection types IP 44 (plug-in devices) and IP 67 (charging module) provide safety against dust and water.
