

UNIQUE MARKETING SUPPORT

What we do at Neal Consulting is provide a highly personalised service for all of our clients by working with you as a reliable and long-term partner, getting you in front of the right type of decision maker, usually C-suite level and above.

Most business owners or directors turn to us as they don't have time to find that diamond of a sales person or business development manager and also don't have time to spend chasing the right type of customer for their business, they just need to get in front of them.

Kirsty is a highly experienced and qualified lead generation expert. She is great to work with and extremely professional. Intuitive and receptive, Kirsty and her team adapt easily as requirements and messaging change. I highly recommend her and Business Hunters.

We provide a highly personalised service for all of our clients by working with you as a reliable and long-term partner, getting you in front of the right type of decision maker, usually C-suite level and above.

It was a great pleasure working with Kirsty. Communication was always very clear and professional. Her and the team are very results and goal driven and make sure, that as a client your voice and input is always heard. I would recommend Kirsty and business hunters to everyone that would like to enter the UK market or that already has done so and wants to expand their sales.

We've been working with Kristy Neal and her team for almost a year, and it's been a fantastic collaboration between our sales force and Neal Consulting. Kirsty and her team have the ability to find and build opportunities, build relationships and have a very good ability to close sales. I can highly recommend Kirsty Neal and Neal Consulting. They have helped us to develop the UK market and helped us to achieve very good results. Best regards Ellen Cathrine Andersen, CEO, EpiGuard AS

Neal Consultants provided great support as the go to person while I was charged with building an international website in a number of languages and then taking that to market. Always quick to respond and made sure everything came in on time and budget, making my life stress free.

Neal Consultancy contacted me about a subscription for an energy related product. I found them very pleasant to deal with, very quick to respond and flexible. Their commercial skills and enthusiasm stand out in a very competitive industry.

I worked with Neal Consultants on setting up a online documentation and update format newbase for Longwood. It was a long process in getting the approvals and understanding of need for the company. They were instrumental in providing good data to put forward to my executive team to build our sales growth.

Since coming on board they have increased our revenue and revitalized the company as a whole, by helping us designing fresh innovative sites, creating custom integrated workflows and sorting out our marketing and sales. Neal Consultancy has set us apart from our rivals and we are constantly up with there with our competitors, far beyond our expectations for business growth.

Delivers results, consistently, is the first truth I can say about Kirsty and the team, professional, friendly and focused also come to mind. Good bi-directional communication, suggestions and self motivation make working with Kirsty and the team a great overall experience and I'd thoroughly recommend Kirsty and the team for Business Development et al co-operation.

Kirsty is incredible at what she does, as are her team. I can't speak highly enough of the way that they approach client care and communication, the diligence and attention to detail put in to delivering results and the value that is provided week in, week out.
