DECARBONISING PATHWAYS FOR ULAANBAATAR'S URBAN MOBILITY. This publication presents the results of the SIPA road map study for Ulaanbaatar under the Sustainable Infrastructure Programme in Asia (SIPA). It features the impacts of three policy scenarios on passenger transport demand and emissions in the capital city of Mongolia between 2015 and ...

The Minister of Road and Transport Development Sambatsogt presented the plan of measures to increase the use of electric cars. The Minister was instructed to approve the plan and monitor its implementation. As of December 2023, 1061 electric vehicles are registered in our country.

Energy Regulatory Commission (ERC) of Mongolia, Newcom Group and ABB Group signed Memorandum of Cooperation and commenced trial run of 100% electric vehicle and chargers in Ulaanbaatar. Tags: Articles, Ecology

Newcom is Mongolia's leading investment firm with over 31 years track record of pioneering change across multiple industries having successfully transformed Mongolia's telecom, aviation, and energy sectors.

Clean Energy Asia LLC (CEA), the second wind powered renewable energy project in Mongolia, was established in 2012 as a joint venture between Newcom LLC and SB Energy of Japan, renewable energy subsidiary of SoftBank Corp.

Main goals are to produce renewable energy in Mongolia, reduce carbon emissions in the area, expanding development of the renewable energy sector in Mongolia in addition to exporting clean energy to other regions thus facilitating the creation of the Asian Super Grid.

CEA has started operations in 2018 and has been a pioneer in providing electricity supply from cleaner sources in Mongolia, with 50 MW Tsetsii Wind Farm providing 3% of country's annual electricity demand. CEA's future goals are aligned with Mongolia's and international Paris Climate Accords goal of producing cleaner energy and reducing global carbon emissions by 2030 and will further facilitate economic and infrastructure development of the country.
