Ultra fast charging station

Ultra fast charging station

Contacting us about a refund?You"ll need to give us a call on 0800 328 1700 if you ordered online. If purchased in store, please call 0800 63 62 62 or speak with a colleague next time you"re in store.

To discover how much it will cost to charge an EV from an IONITY charge point, head to Zapmap"s Public Charging Calculator. This allows you to select any new or used plug-in vehicle, and tailor elements - such as electricity cost and charge required - for personalised results.

Access to the IONITY network is via RFID card, smartphone app, or QR code. In the future, access to IONITY points will be able to be carried out simply by plugging the EV in, with communication between car and charger activating the session and billing the user.

Zapmap monitors the prices of charging on the public network and reports on the prices charged by the top 10* rapid charging networks. The prices are updated on a monthly basis here: Rapid Charging: Top 10 Network Pricing

The price to charge an electric vehicle (EV) on the public charging network can vary substantively, and prices are increasing due to current issues in the energy market.Updated on a monthly basis, the Zapmap Price Index shows the difference in prices paid depending on the type of charger and will also track how this is changing over time.

IONITY is backed by Audi, BMW, Mercedes, Ford, and VW, and looks to offer its CCS-only ultra-fast charging stations every 100 miles along the major motorways of 24 European countries. The network has points available in the UK and is expanding rapidly.
