Understand and respond to your competitors' business structure, strategy and prospects.

"The GlobalData platform is our go-to tool for intelligence services. GlobalData provides an easy way to access comprehensive intelligence data around multiple sectors, which essentially makes it a one-for-all intelligence platform, for tendering and approaching customers.

"COVID-19 has caused significant interference to our business and the COVID-19 intelligence from GlobalData has helped us reach better decisions around strategy. These two highlights have helped enormously to understand the projections into the future concerning our business units, we also utilise the project database to source new projects for Liebherr-Werk to use as an additional source to pitch for new business."

Your daily news has saved me a lot of time and keeps me up-to-date with what is happening in the market, I like that you almost always have a link to the source origin. We also use your market data in our Strategic Business Process to support our business decisions. By having everything in one place on the Intelligence Center it has saved me a lot of time versus looking on different sources, the alert function also helps with this.

Having used several other market research companies, I find that GlobalData manages to provide that "difficult-to-get" market data that others can't, as well as very diverse and complete consumer surveys.

Our experience with GlobalData has been very good, from the platform itself to the people. I find that the analysts and the account team have a high level of customer focus and responsiveness and therefore I can always rely on. The platform is more holistic than other providers. It is convenient and almost like a one stop shop. The pricing suite is highly competitive and value for our organisation.

I like reports that inform new segments such as the analysis on generation Z, millennials, the impact of COVID 19 to our banking customers and their new channel habits. Secondly the specialist insight on affluent sector significantly increases our understanding about this group of customers. The combination of those give

us depth and breadth of the evolving market.

"I know that I can always rely on Globaldata's work when I'm searching for the right consumer and market insights. I use Globaldata insights to understand the changing market & consumer landscape and help create better taste & wellbeing solutions for our customers in food, beverage and healthcare industries.

GlobalData provides a great range of information and reports on various sectors that is highly relevant, timely, easy to access and utilise. The reports and data dashboards help engagement with clients; they provide valuable industry and market insights that can enrich client conversations and can help in the shaping of value propositions. Moreover, using GlobalData products has helped increase my knowledge of the finance sector, the players within it, and the general threats and opportunities.

I find the consumer surveys that are carried out to be extremely beneficial and not something I have seen anywhere else. They provided an insightful view of why and which consumers take (or don't) particular financial products. This can help shape conversations with clients to ensure they make the right strategic decisions for their business.

Subscribing to our intelligence platform means you can monitor developments at UAE Solar PV Market Analysis by Size, Installed Capacity, Power Generation, Regulations, Key Players and Forecast to 2035 in real time.
