In a changing world, Renault has created a response to your diverse needs: the E-TECH range. Enjoy new driving experiences, all while saving on fuel, with Renault's hybrid and plug-in hybrid vehicles. Take the first step towards the future!

Discover a whole new world with the Renault E-TECH range. In the city or the countryside, driving Renault hybrid and rechargeable hybrid vehicles limits particles and hydrocarbons while driving. The advantage? These vehicles have redefined driveability!

Optimise your vehicle's fuel consumption with E-TECH Hybrid technology. Born from Renault's expertise in energy management, it helps you adapt your driving mode to your travel. That way you can reduce fuel consumption by up to 40% in the city.

Short trips in the city and long journeys in the countryside? Opt for a rechargeable hybrid vehicle and get the benefits of two types of engine in one car! Drive around the city in full electric mode. At the push of a button, switch to the combustion engine for longer trips!

E-Tech is the innovative and exclusive technology of Renault. Protected by 150 patents, it was developed in collaboration with the Renault F1 teams, and draws on our expertise in electric vehicles.

The E-Tech Hybrid drive system combines a combustion engine, two electric engines and a battery. Equipped with an automatic gearbox, our hybrid vehicles are efficient and smart in terms of energy management. Drive even greater distances in full electric mode!
