

Vatican city electric vehicle infrastructure

Imelda Labbacute;, member of the board of management for sales, marketing and after-sales at Volkswagen Passenger Cars, and Dr Christian Dahlheim, chairman of the board of management of Volkswagen Financial Services, personally handed over the first two electric vehicles to the Vatican, two ID3 Pro Performance models.

Dahlheim said: "We are delighted to support the Vatican in this important project. This is something very special for us and shows that we are absolutely competitive with our mobility solutions."

The Vatican City State is committed to the implementation of sustainable solutions that make it possible to reduce the impact of human activities on the environment in order to protect the planet.

Mobility is at the heart of its sustainability programme called "Ecological Conversion 2030", which aims to reduce the CO2 footprint of the Vatican state's vehicle fleet.
