Victron batteries prices

LiFePO₄ batteries do not need to be fully charged all the time. A partial charge may even slightly improve service life. In addition, LiFePO₄ batteries have a wider operating temperature range, excellent cycling performance, lower internal resistance and higher rate of efficiency than lead acid batteries.

VictronConnect lets you get live status information and configure any Victron products which either have Bluetooth built in, or are connected to a VE.Direct Bluetooth Smart Dongle, or a VE.Direct to USB Interface

This product's casing/housing is classed UL94 V-0. In simple terms, this means that the casing/housing is considered flame retardant in accordance with the plastics flammability standard.

BAT412110081 - The Victron AGM Super Cycle Batteries have a very low internal resistance making them particularly suitable for high current discharge applications such as for inverters, thrusters and winches. VRLA AGM: design life 7-10 years

The paste of the positive plates is less sensitive to softening, even in case of repeated 100% discharge of the battery, and new additives to the electrolyte reduce sulfation in case of deep discharge.
