ZOLA Electric, one of Africa's leading renewable energy providers, has launched a robust distribution scheme to drive market penetration and access to its product in its quest to provide clean, effective, and reliable power anywhere.

Already, ZOLA Electric has signed into their distribution network some of the leading distributors of solar and renewable products across Nigeria and has opened its doors to onboard even more. Blue Camel, a leading provider of renewable energy solutions including PV panels, solar streetlights, solar home systems, and a major distributor for global solar brands, was recently signed into the scheme. Blockchain, Black bit Solar, Shokenny Solutions, Enersys Energy, Solarmate Energy, and SOSAI Renewables are already in different stages of the distribution partnership.

The move by the brand, which currently serves over one million users across three continents in over ten countries, is part of its efforts to boost its current market operation, as well as provide reliable power solutions to markets that lack energy access and make it possible for homes and businesses across Africa and anywhere in the world to generate, store and consume energy sustainably.

He added that: "The ZOLA power solutions help to provide customers with steady electricity supply in any situation. The ZOLA technology-driven solutions backed with superior power storage and dynamic energy charging system were conceived at Oxford University and designed in Silicon Valley. They are easy to install, scalable, and help the average home or business bridge their power deficit.

“With ZOLA currently powering more than 1 million people; comprising over 200,000 homes and businesses across Tanzania, Rwanda, C?te d’Ivoire, Ghana, and Nigeria, we are poised to actualise our objective providing 24 hour clean power anywhere and help the continent realise her untapped potentials.”

ZOLA Electric is the leading renewable energy technology company in Africa and our overarching purpose is to help our end-user and distributor customers power homes and businesses and stay connected with clean, affordable, and reliable Power Anywhere. By providing affordable and accessible distributed smart storage + solar technology, ZOLA helps the average home or business leapfrog the grid.

Starting out 8 years ago by providing solar home solutions to off-grid rural communities in Tanzania, ZOLA has evolved into a technology company whose products can solve an energy access problem. We partner with leading companies to distribute our products globally.

ZOLA powers more than 1 million people each day and more than 200,000 homes and businesses across Sub-Saharan Africa. ZOLA is a recipient of the UNFCCC Momentum for Change Award and the Zayed
